PROFILE

I am a frontend Developer with 1 year of experience in building scalable and efficient web applications. I have hands-on experience in HTML CSS BOOTSTEB JS I specialize in delivering high-quality code, optimizing performance, and implementing secure authentication and authorization systems. Passionate about problem-solving and continuous learning to create robust and secure backend solutions

Professional Experience

Front-End Developer

- Personal Projects / Freelance
- Developed and deployed 5 fully responsive websites using HTML, CSS, and Bootstrap.
- Collaborated on UI/UX implementations for complex designs.
- Used Git and GitHub for version control and project management.
- Focused on responsive design principles and user experience across different devices.
- Prioritized performance and accessibility in all projects.
- Integrate front-end user interfaces with application programming interfaces (APIs) using technologies like fetch and Axios to dynamically fetch and display data.
- Effectively collaborate with the backend team to ensure data integrity and secure information exchange between the two interfaces.
- Test and troubleshoot API requests using tools like Postman and DevTools.
- Implement authentication and authorization systems via API
-
- Coordinate with backend developers to review and update endpoints to ensure an improved user experience.

EDUCATION

Higher Institute for Advanced Studies Katameya   *07/2025 – Graduated*
Systems and information– Cairo , Egypt
